github.com/thatjp

Passionate fullstack developer with +7 years of experience building web and mobile applications using React, Typescript, [Node.js](#) and Python. Proven track record in leading teams, managing full project lifecycles, building large, scalable web and mobile applications.

Primary Technical Skills

Frontend: React, Typescript, React Native, Redux, WebRTC

Backend: Node.js, Python, Django

DevOps/Hosting: AWS, Pantheon, Heroku, Google Cloud Platform

Education

Miami University
2015

Flatiron School
2016

Professional Experience

Waters Corporation – Lead Frontend Web Developer

July 2025 - Present

- Designed and built a [React.js](#) and Typescript frontend for an AI powered chat tool which fields the questions of the 350,000 monthly [Waters.com](#) users.
- Lead a talented cross departmental team of 5 while maintaining strong communication with other teams in the engineering department resulting in the smooth and timely delivery of milestones.
- Designed and built Java Springboot based applications for directing complex API calls and aggregating data between the Water's Adobe AEM system and the AI Tools I integrated.

American Express – Frontend Web Developer

Sep 2024 – May 2025

- Built React.js components for American Express dashboards seen by 15M+ users daily.
- Maintained 100% code coverage using Jest and TDD practices.
- Collaborated with 75+ engineers and cross-functional departments to meet release deadlines and mission critical objectives.
- Reviewed pull-requests in Github and worked with my team to create any necessary documentation needed.

Ruckus Marketing – Lead Fullstack Developer & Director of Technology

Dec 2019 – Oct 2022 | New York, NY

- Delivered 30+ projects using React.js, Typescript, Next.js, Node.js, Python, Django Rest Framework, AWS, Wordpress and Shopify during my time as Director of Technology.
- Grew the Ruckus' fullstack development team from 1 to 7 during my time as Lead Fullstack Developer before being promoted to run the 25 person technology department.
- Trained the existing team of Wordpress developers on [React.js](#) and typescript to ensure talent coverage on our existing projects and expand our opportunities for clients interested in "headless" web projects such as in [gatsby.js](#).
- Developed internal CRM and productivity tools with React, [Node.js](#), Python and bash to increase cross departmental transparency and internal productivity.
- Directed our 3 development teams of 4 - 6 and a design team of 3 to create a scalable React Typescript UI component library that allowed us to cut project spin-up time by +2 weeks.

Dauntless – Frontend React Developer

Jan 2019 – Oct 2019 | New York, NY

- Created UI components using React.js, Redux, SCSS, and a custom Google Maps API.
- Built [React.js](#) modules and UI within Adobe Experience Manager for a client who's 4 million users would use my applications daily. Developed Java and Springboot backend applications used as middleware for geolocation services and data aggregation.
- Worked alongside a multinational team of 40 in remote settings to deliver time sensitive projects.

goldi – Frontend React Developer

Jan 2018 – Oct 2018 | New York, NY

- Designed, developed and delivered the first WebRTC based video recorder which was the cornerstone of goldi's market fit.
- Used Jest and Enzyme to support TDD and ensure component stability.

Freelance & Contract Work

Jan 2023 – Present

- **Duet** (2024 - 2025): Built the backend in Python and Django for Duet and some React, Typescript components. Worked closely with Duet's data team to ensure data aggregation and delivery processes were done correctly and HIPAA compliant.
- **LumiSync** (2023): Rebuilt the state management system to vastly improve code legibility, application scalability and speed.

- **Atlas Seed** (2023): Developed a [Node.js](#) based Shopify App that would help Atlas Seed keep better track of inventory. The solution allowed the Atlas team to sell at farmers markets all the way through to bulk international buyers.
